Part Six – Risk Warnings and Information about Investment Risk

- Share prices, and the prices of other investment instruments and products, can go down as well as up. This means that you may get back less than you originally invested in the Unicorn AIM IHT Tax & ISA Portfolio Service. In the case of equities generally, not only will their price and value vary but dividend payments may also fluctuate in line with the fluctuating trading performance of the issuing company.
 - Stock markets are volatile, which means that prices can move up and down sharply in the short term and can vary significantly depending on trading volumes in the market. If you instruct us to sell your investments during a down turn, you may be exposed to a greater risk of loss than you would if you waited for markets to recover. For this and other reasons, equity investments should usually be looked at as a medium to long term investment; generally that means investing for a period of 5 years and above to benefit from positive movements in the equity markets.
 - An investment in the Unicorn AIM IHT & ISA Portfolio Service should not be considered as a short term investment and may not be suitable for you if you consider it likely that you will have a short term need for a substantial proportion of the money you have invested.
 - Although markets and commentators typically track historical data and may use it when considering investment decisions, past performance is not a guide to future performance.
 - The extent and value of any tax advantages or benefits arising from the use of tax-advantaged services will vary according to individual circumstances and government legislation. The levels and bases of taxation may also change. You are recommended to seek advice from an FCA authorised person or an appropriately qualified tax adviser regarding the tax implications of any investment through the Unicorn AIM IHT & ISA Portfolio Service.
 - Investing in AIM listed, smaller capitalised companies is high risk and may expose you to a significant risk of losing your investment.
 - It may be difficult to obtain accurate information in order to determine the current value of your investment through the Unicorn AIM IHT & ISA Portfolio Service.
 - Many smaller quoted companies have small management teams and are highly dependent on the skill and commitment of a small number of individuals. The performance of these companies may therefore be adversely affected by the departure or unavailability of certain key personnel.
 - Smaller, AIM quoted companies commonly experience significant change and carry higher risk than is the case in larger or longer established quoted companies.
 - Force majeure events, which are events beyond the control of any party, including fire, flood, earthquake and other acts of God, terrorist attacks and war may affect a party's ability to perform its contractual obligations or may lead to the underperformance of an investee company.
 - WM Capital Management will use its best endeavours to invest in companies
-

Risk Warnings and Information about Investment Risk (Cont.)

quoted on AIM which qualify under the Business Property Relief rules. However, WM Capital Management cannot guarantee that all investments will qualify for such relief and therefore accepts no liability in this regard.

- Following the admission of a company to the main market of the London Stock Exchange, Business Property Relief for Inheritance Tax purposes will cease.
- The levels and bases of reliefs from taxation may change or such reliefs may be withdrawn. The tax reliefs referred to in this Document are those currently available in accordance with current legislation and their value depends on your individual circumstances at the point of investment.
- An investment in an Income portfolio could result in additional capital gains relative to a Growth portfolio, which could result in a capital tax liability, as a result of selling shares to raise cash to pay fees, unless the investment is held in an ISA.
- An investment in an Income portfolio is likely to result in additional trading fees relative to the Growth portfolio as a result of selling shares to raise cash to pay fees.
- An investment in a Growth portfolio may result in a growing cash position if the level of dividends received exceeds the level of fees on the portfolio. Such cash will be reinvested into shares as appropriate but, until such time that it is reinvested, it will not qualify for Business Property Relief.
- Shares in AIM companies are illiquid and it may take some time to invest and disinvest your portfolio.
- Market makers may not be prepared to deal in all AIM quoted securities.
- While funds remain un-invested they will not be subject to market movements (either up or down). However, the two year holding period required for business property relief only starts from the date of investment in qualifying shares. WM Capital will use their best endeavours, subject to market conditions, to invest client's funds within 4 weeks of receipt of application.
- However, when we consider trading conditions to be unfavourable (i.e. periods of sustained market volatility), WM Capital will use their discretion to act in the best interest of the client and ensure a policy of best execution. As a result, at times it may take longer than the anticipated 4 weeks to fully invest the client's monies.

This list is not intended to be exhaustive and you should discuss the element of risk affecting your investments with your financial adviser.
